

'KEEP BRITAIN TIDY' BIG SCHOOL CLEAN UP EVENT

Dear Parent / Carers

We are very proud to be taking part in a litter picking event as part of the "Keep Britain Tidy" environmental charity. Children across school will be involved in a 'clean up' either on school grounds or in a local area. We have been able to loan litter picking equipment for this from our local community development team. We will also be using biodegradable sacks to make this an eco-friendly event!

This event has been organised to run alongside our Science Week which will focus on 'Plastic Pollution' where children will learn about the damaging impact on the use of plastics on our environment. We want our children to love and respect their community and to see that a world without litter is a better place to live in.

Our whole school litter pick will be carried out in school time during the **week commencing 25th March – 29th March**. However, to make this a real community event we would love for our children and families to get involved out of school. During this week we would like children to take part in their own litter pick, which could be on their way to school or maybe whilst walking to the shop. They will be provided with a litter picker and biodegradable sack for this. However, we have only been able to loan a small number of pickers so if you would like to take part in this with your child please ask them to tell their class teacher where they will add their name to a list.

We would really appreciate your involvement with this and help us to show our children that with everyone helping we can make a difference!

Thank you for your continued support.

Yours faithfully

Mrs C Jones
Healthy, Eco and Forest School Co-ordinator
