

All About Me

During our first half-term, we will be working on a topic called 'All about me'. We will be thinking about what memories we already have and what memories we would like to create. We will talk about different milestones in our lives and the special people that we share our memories with.

English

We will be talking about and describing family members. We will also look at our own milestones in our lives and add them to a timeline.

We will look at instructions and how they are used and apply that to write our own instructions. This will be linked to some work we do on traditional tales.

Science

We will be looking at different materials, describing them and then thinking about which materials are best for different purposes. We will also start looking at the seasons.

P.E.

This term we will be working on netball and football.

Computing

We will be looking at how we use computers and other technological equipment. We will be learning how to use computers correctly and safely.

History/Geography

We are going to look at the history of our family within our own living memory. We will look at the similarities and differences from when we were a baby to now.

We will begin looking at our local area and some significant landmarks.

Music

We will be working on recognising and producing different pitch and tempo within known pieces of music.

R.E.

Linking in with work on our families, our R.E. topic is called 'Belonging'.

Maths

This half-term will mainly be about number recognition and place value in a 2-digit number. We will start looking at simple addition and subtraction and then naming and describing 2D and 3D shapes.

The Arts

We are going to be creating some self-portraits and pictures of our families. We will also be designing and making a rain gauge to investigate the weather across the seasons.
